

ACTION RECOVERY: BRAIN INJURY (BI) SERVICES

Our supportive team works together to provide specialized services to individuals with brain injury. Services ensure an integrated model focusing on physical and behavioral health. Visiting specialists, including a licensed nutritionist, occupational/speech/physical therapists, licensed psychologist, and primary care physicians can offer options to promote holistic health.

Services include:

Assessments

- Strength-based
- Individualized assessments of cognitive, emotional, physical, and social functioning to establish attainable goals

Residential Habilitation

- Up to 24/7 support
- Transitional Housing with up to 24 hours residential support
- Individual 1:1 support as needed
- Multiple settings to permit customization of supports
- Medication administration and activities of daily living assistance
- Establish daily routine and schedule
- Offers YMCA membership
- Prevocational services

Structured Day

- Available up to 8 hours a day
- Develop/maintain independent living skills
- Individualized supports for social, cognitive, and recreational skill building
- Vocational and tutoring assistance

Community Integration

- Develop social connections
- Use of community resources
- Transportation provided
- Reintegration into life roles and community supports

New Vitae has established services in compliance with Commission on Accreditation of Rehabilitation Facilities (CARF) standards to ensure a high standard of personalized care.
